
AIST-MeRAM: a Software Partially Supported by LRI are Released Simultaneously with its Japanese Version and its English Version

AIST-MeRAM is a free, user-friendly software for ecological risk assessment and management of chemicals substances.

By installing AIST-MeRAM on your computer, you can perform assessment with only a few mouse clicks – ranging from Hazard Quotient risk assessment to high level risk assessment using species sensitivity distribution and population-level effect models. AIST-MeRAM contains not only these assessment models, but also toxicity test data on approximately 3900 substances and the emission factors of chemicals under CSCL (Chemical Substances Control Law of Japan). You can thus use the tool even if you don't have data at hand or expertise in ecological risk assessment and statistical analysis.

Current release versions are 1.0.1 in Japanese and 1.0.0 in English. If you are interested in the tool, you can download it for free from the Download page.

To download the Japanese Version of AIST-MeRAM 1.0.1, please click to <http://meram.aist-riss.jp/download/>

To download the English Version of AIST-MeRAM 1.0.0, please click to <http://en-meram.aist-riss.jp/download/>
